

# Type VINTAGE

## Fuel plug valve for vintage bikes

**Type VINTAGE**  
oil valve

**Type VINTAGE**  
fuel valve  
with reserve option

- valve position:  
OPEN, CLOSE and RESERVE
- stainless steel design

Connection G 1/4, other Sizes  
on request

Range of application:  
-76 < T < 446°F

### Design characteristics

- cavity-free
- PTFE sealing
- maintenance-free, self-lubricating
- no drying-out or sticking of the seal

### Option

- nylon filter
- hose connection
- special connection

*Old motorbikes are often stored in "dry" condition: No fuel in the tank. Hence the sealing of the fuel valve remains dry for a long period of time. In case of re-use, traditional fuel valves tend to leak. The self-lubricating and cavity free AZ-Vintage plug valve is the solution for a reliable and safe motorbike trip.*
