

# Product range AZ ball valves

## Design overview and options

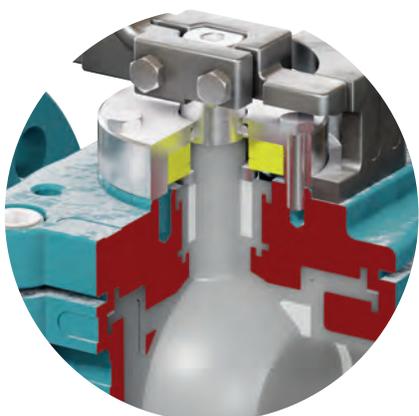

### Type NVN-EXTRA

- split body design
- cavity minimized
- full bore design (optional with reduced bore design available)

### Sealing systems

- adjustable triple packing (sealing system CAS)
- disc springs for initial tension of packing "live-loaded" (sealing system CAS-SL)

## other types

### Type NEO-VAL

- split body design (short face to face dimensions)

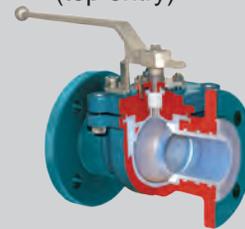

### Type KA

- split body design
- vessel bottom outlet valve

### Type Monobloc

- one-piece body design (top entry)

## one-piece ball

- anti blow-out design in case of high pressure or disassembly
- no risk of wear and tear between ball and shaft
- no danger for the lining
- constant torque
- optional: precise control with linear or equal percentage characteristics (type RH)
- customized solutions

## safe lining

- chemical resistant PFA/FEP lining
- minimum 3mm FEP/PFA lining
- locked in lining
- suitable for toxic and aggressive chemicals

## Standard materials

### Body:

- Stainless Steel 1.4408 / A351/CF8M
- Ductile Iron EN-GJS-400-18 / ASTM A395 (DN  $\geq$  8")
- Carbon Steel 1.0619 / ASTM A216 WCB

### Ball:

- ASTM A995 - CD4MCUN (DN  $\leq$  4")
- Carbon Steel 1.0619 / ASTM A216 WCB (DN  $\geq$  6")

# Type KA

## Lined bottom outlet valve

- self-lubricating and maintenance-free
- cavity minimized
- short pattern

NPS ½ - 8 / Class 150

Range of application:  
14 < T < 302/410°F

### Design characteristics

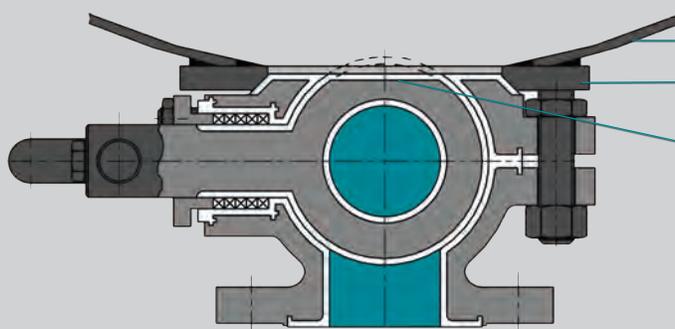

- vacuum-capable
- completely PFA / FEP lined
- high corrosion-resistance of aggressive media
- full bore design
- conditioned by the design, no remaining quantity of crystalline or polymeric media remains in the vessel
- body material Carbon Steel 1.0619, ASTM A216 WCB

### Options

- flattened ball design "F"
- other materials

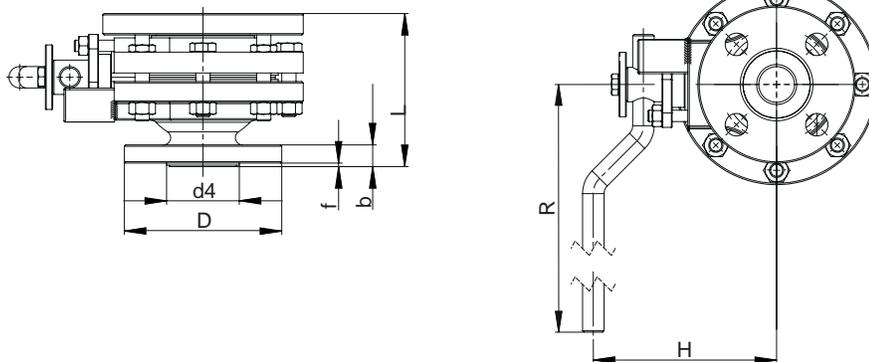

PT diagram, plug types, sealing systems, material selection: see catalog part ENGINEERING

- vessel
- mounting flange (welded)
- Ball designs  
R = round ball (standard)  
F = flattened ball  
(to get a plane surface in the vessel)

# Type KA
