

Type SSV

Spoon sampling valve

for free falling granulates, powders
and non-sticky pastes

$V_{P \min}$ 1.7 oz / $V_{P \max}$ 33.8 oz per stroke

- representative sample
- safe and simple operation
- FDA compliant

Class —
Temperature: -40 bis 480°F
Ventilation to atmosphere

Design characteristics

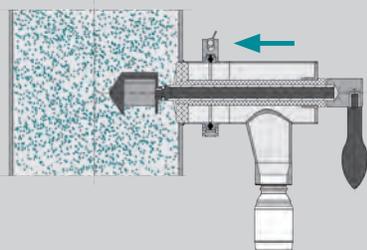

- easy installation
- representative sample, defined volume
- welding connection
- installation position 90°
- material: stainless steel 1.4308, ASTM A341 CF8

Options

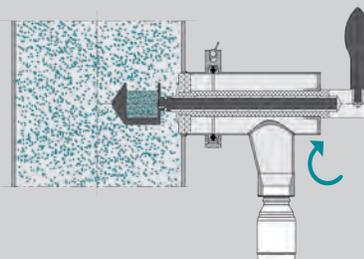

- other materials
- other lab bottle adapter
- sampling volume: 100 ml, 250 ml and 1000 ml
- other sampling lancee

Functionality

advance spoon lance

filling

sampling drawing and resting position
