

Type ESV

Extruder sampling valve

- representative sample
- safe and simple operation
- FDA compliant

for free falling granulates
and pastes
Sampling volume:
variable

Class —

Temperature: -40 bis 480°F

Ventilation to atmosphere

Design characteristics

- easy installation
- representative sample,
- installation position 90°
- material: stainless steel 1.4308,
ASTM A341 CF8

Options

- other materials
- other lab bottle adapter

Functionality

To remove old media from the extruder turn counterclockwise.

After turning the handwheel clockwise to take a sample
