

Type ISO-FV / ISO-FVN / ISO-FV-LT

ISO flange extensions

- applicable for all AZ valves
- standard extension
100 mm / 4" high
- available in any desired length

Valve with flange extension
(standard)

Design characteristics

- extension with two identical flanges and stem extension
- solid construction made of stainless steel 1.4308, ASTM A351 CF8
- simple mounting
- for extended operation
- for thick-walled insulation
- actuator mounting flange acc. to ISO 5211
- plug adjustment freely accessible

Options

- special material
- other heights

Valve with flange extension
(special height)

Installation examples

Setup with manual operation

- plug valve
- flange extension ISO-FV-100
- lever with limit stop, alternativ with plug-stem-extension (T-wrench)

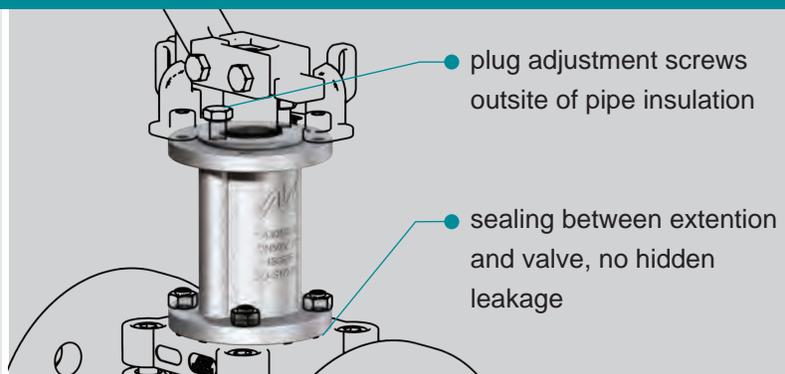

Setup with gear box or actuator operation

- plug valve
- flange extension ISO-FV-100
- bracket for flange extension for gear box or actuator

Typ ISO-FVN

- flange extension with integrated plug adjustment screws
- adjustment outside the pipe isolation possible
- for ISO bracket F05 up to F10 available

Type ISO-FV-LT

- extended bonnet with upper stem sealing
- ideal for Low Temperature applications
- detection port for early recognition of potential leakages (optional)
- dip plate (optional)
